Comparative Vertebrate Anatomy a Laboratory Dissection ...

Comparative anatomy is the study of similarities and differences in the anatomy of different species. It is closely related to evolutionary biology and phylogeny (the evolution of species).. The science began in the classical era, continuing in Early Modern times with work by Pierre Belon who noted the similarities of the skeletons of birds and humans. ...

Comparative Vertebrate Anatomy A Laboratory Dissection ...

The available vertebrates will be: stingrays, salamanders, lizards, snakes, turtles, chickens, minks, and rabbits. As you dissect your chosen vertebrate, you will compare it to the other vertebrates that you dissected in the course, and you will include these comparisons in your dissection guide.

COMPARATIVE VERTEBRATE ANATOMY - Hendrix College

Having taught Comparative Anatomy Lab with this book I would not recommend it to someone who is going through dissection for the first time and alone. A good sense of terms (ie. medial, caudal etc) and such is a must. Even having gone through dissections of hundreds of cats some things are still difficult to find.
