Engineering systems with desired behaviors.

Instrumentation and control engineering -
Wikipedia

Instrumentation engineering focuses on control processes that use sensors as an input. This field of engineering can be concerned with equipment processes using sensors to observe many types of variables including pressure, pH, voltage, temperature and many more. Feedback from such sensors can be used throughout the manufacturing process.

What is an Instrumentation Engineer and what do they do ...

Instrumentation Engineering is defined as the art and science of measurement and control of process variables within a production, or manufacturing area. It is
