So I noticed that VW is selling a new head-unit to upgrade the MK5 and MK6 head-units so they must've finally admitted that the MK5 head-units suck. Anyways, has any one had experience which one is better? Are they similar in power output and options? A used RCD is around \$300 used, but a RMT 300 is \$450 from VW but its new. Any help would be greatly appreciated. :wave:

Is anyone experiencing a high-pitched hum/buzzing from the RMT 100+ or knows where it's coming from? I swapped out the original double-din Monsoon with the RMT 100+ using the adapter harness and antenna cable as indicated in the posts above. Everything works fine except for the noise. The noise is present even when the radio is on mute. Thanks!

The RMT-300 (from what I've gathered) doesn't have any connections for CAN BUS communications. Therefore you need something that can read those signals and interpret them to cut the power to the radio when the key is switched off and when to activate the illumination.
