Functions Review for Mastery: Graphing Functions You can express solutions to equations as ordered pairs. To express solutions to $y = x - 3$ as ordered pairs, substitute the given values for x in the equation. Then write the solutions as ordered pairs. Use the given x-values to write solutions to $y = 2x$ as ordered pairs. 1.

review for mastery
Review for Mastery Identifying Linear Functions You can determine if a function is linear by its graph, ordered pairs, or equation. Identify whether the graph represents a linear function. Step 1: Determine whether the graph is a function. Every x-value is paired with exactly one y-value; therefore, the graph is a function. Continue to step 2.

Review for Mastery - Mr. Gonzalez's Algebra Class.
Robert Greene's Mastery explores the lives of many historical Masters (Mozart, Da Vinci, Proust, etc.) and explains how their Mastery is attainable for everyone. By ignoring societal constraints and complications, following our own interests, serving time in an apprenticeship phase, and staying committed to our craft, Greene believes that everyone can become a Master and make lasting contributions to society.
