Find the error in the following proof that $2 = 1$. Consider the equation $a = b$.

Multiply both sides by a to obtain $a^2 = ab$.

Subtract b^2 from both sides to get $a^2 - b^2 = ab - b^2$. Now factor each side, $(a + b)(a - b) = b(a - b)$, and divide each side by $(a - b)$, to get $a + b = b$.
