The Neuroscience Of Handwriting Applications

Bridging the gap between theory and practice, The Neuroscience of Handwriting: Applications. The Daubert trilogy of U.S. Supreme Court cases has established that scientific expert testimony must be based on science grounded in empirical research. As such, greater scrutiny is being placed on questioned document examination generally, and handwriting comparison in particular.

When the stories weren't being churned out, I was frantically looking to stockpile ideas, knowing I would need a fresh one, soon. While my friends were counting down the days until N64 was released or passing around a video bootleg of last night's "South Park" episode, I spent my nights determined to come up with a better ending, trying to make this story better than the last.
